

Peases West Primary School

Key Stage 2 Zone

We have been staying in our houses because of an illness. It is called coronavirus. Coronavirus can make people feel very sick.

To keep ourselves safe, we must be socially distant from others unless they live in our houses or are part of our social bubble.

Social distancing means we have to stay at least two metres away from people when we are outdoors and not at home.

When we can go back to school, we still have to try and stay two metres apart from our friends and teachers and we must wash our hands lots of times each day.

Washing our hands will help us stay safe too. We must wash our hands for 20 seconds using soap and water. We can also use hand sanitiser. These are available in school.

Some people might wear masks and face visors which cover part of their faces. Sometimes people might wear gloves and aprons to cover parts of their bodies to help you if you injure yourself or feel poorly. This is another way to keep safe and stop them spreading any germs. It might look a little frightening but we will get used to it and we can tell an adult if we are feeling worried.

We might have to start and finish school at different times to our friends. This is to make it easier to stay two metres away from people who do not live in our houses.

Our playtimes and lunchtimes will be different too. This is to keep us safe. We might need to eat at different times and play in our small groups. This might make us feel sad but we will still have fun playing with the people in our group.

It may feel strange because we cannot hug, high five or touch anyone who does not live in our house.

Things may feel different for a while and this might make us feel sad or worried.

If we feel sad or worried, we can talk to people we trust at home or adults at school and they can help us feel happy and calm.

Social distancing may feel strange but it will help keep everyone happy, healthy and safe.
